

Database's Homework 3: Normalization's exercises for 1NF

Daniel Alberto Zarco Manzanares

March 24, 2020

Introduction

Here shows first normalization form about the example that show in class where we must go to first normalization form.

1NF

First table

[NID(PK), Name, Last name]

N.I.D.	Name	Last name
2938429374R	John	Smith
8342378442G	Carmen	Williams
374t8937289S	Daniela	Brown

Second table

[(NID(FK), Store Code) PK, Store direction, Work shift, Date]

N.I.D.	Store code	Store direction	Work shift	date
2938429374R	100N	Helm street 13	M	1/2/20
8342378442G	102K	Cobalt street 13	M	1/2/20
374t8937289S	100N	Helm street 13	M	1/2/20

Notes

Information that shows on above tables is false and information is not real. I was waiting the Database's presentation upload at Fernando Arreola's repository but presentation was not uploaded.
